

CCSi Durometer Service & Calibration

CCSi is a specialist in the service and calibration of all types of durometers!

Our technicians have been factory trained or certified by most internationally recognized durometer manufacturers.

Our world-class durometer calibration facility has earned OEM status and complies to the strict requirements of manufacturers, calibration laboratory accreditation services, and standards development organizations (SDOs).

As an authorized distributor for market leading durometer manufacturers, high quality service, replacement parts availability, and the currency of technological advancements is assured!

All Calibration Standards are traceable to the National Institute of Standards and Technology (NIST). The calibration services and reports provided will meet your ANSI, ASTM, DoD, EuroNorm (EN), ISO, ISO/IEC, MIL, and other standards, as well as proprietary inter-company standards and customer/supplier requirements including those of automobile manufacturers.

CCSi services, repairs and calibrates Durometers of all makes including:

- Asker®,
- Gibitre®,
- Hildebrand®,
- Hung Ta®,
- PTC®,
- Rex®,
- Shore®,
- and Wallace®.

Factory Authorized CCSi service, repair, and calibration includes:

- Initial inspection;
- Initial inspection report;
- Complete disassembly;
- Inspection of all components at 10x;
- Necessary component replacement (with prior approval);
- Reassembly;
- Adjustment to the manufacturer's specifications;
- Calibration to the manufacturer's specifications and applicable standards;
- Certification to applicable requirements and standards;
- Final calibration report;
- Certificate of calibration.

<ul style="list-style-type: none">● A Quoted Price will be <u>inclusive</u> of NIST traceable certification to a <i>single</i> applicable standard;● Certifications to additional standards are \$30.00 each;● Price is exclusive of additional parts and labor;● Additional charges for repairs are quoted upon completion of inspection;● An inspection fee of \$30.00 <i>may</i> be charged if the instrument is not repaired.
72 Hour Rush Service Available!

The calibration instrumentation used is regularly calibrated and maintained to the highest standards in accordance with all applicable standards, procedures and methods. The reports of maintenance and calibration are on file and available for inspection or may be provided for a nominal fee.

 CCSi reserves the right to decline the calibration of durometers which, *by design*, can not, or do not, comply to an internationally recognized durometer standard. This is without regard to explicit or implied claims of compliance stated by the manufacturer. Substandard durometers should be returned to their manufacturer, original supplier, or removed from service.

"This laboratory is accredited in accordance with the recognized International Standard ISO/IEC 17025:2005 General Requirements for the Competence of Testing and Calibration Laboratories. This laboratory also meets the additional program requirements in the field of calibration. This accreditation also demonstrates technical competence for a defined scope and the operation of a laboratory quality management system (refer to joint [ISO-ILAC-IAF Communiqué](#) dated 18 June 2005)."
